PROFILE

Business Administration & Marketing graduate who puts marketing into practice: **2nd place at the European Markstrat** (marketing strategy simulation) and built a fashion brand with an international team on the BrandY programme. I use Shopify, WooCommerce, Photoshop, Illustrator and Premiere Pro, and I automate content with AI: with Claude Code I built a YouTube channel that publishes a new video every day on its own. I currently work in commercial management at Moll Motor (180 vehicles/month, 14 brands).

EXPERIENCE

Commercial Management & Sales Technician — Oct 2025 – Present
Moll Motor S.L.

- Commercial and administrative management of an average of **180 vehicles/month** across **14 brands**, from purchase from the brand to final registration.
- Coordination with each brand's sales directors on monthly targets, rebates and bonuses.
- Margin review and preparation of the BM report sent to the brands.
- Collaboration with the engineering team on integrating AI into processes, mapping the commercial workflow.
- Customer service: handling and resolving calls.

Sales Agent Intern — Jul – Sep 2023
Locatec S.L.

- Client visits and analysis of potential client areas.
- New-client acquisition and preparation of commercial proposals.
- Built the database of visited and acquired clients.

Logistics & Warehouse Assistant — Summers 2020 & 2022
Tecatel S.L.

- Order preparation, goods-in checks, stock management and relocation, returns (RMA).

Personal Assistant Trainee — Jul – Aug 2018
Gestión de Proyectos Gandía (GpG)

- Tracked residents' payments in Excel, handled complaints and drafted information letters.

AI & AUTOMATION PROJECTS

Automated YouTube channel · personal project, 2026
Built with Claude Code a pipeline that researches topics, writes original scripts, narrates them with text-to-speech and renders long-form philosophy videos in Spanish, publishing a new video every day.

AI paper-trading simulator · personal project, 2026
Simulated trading app with three bots (quant, news and insider signals) that combine rules with a local LLM (Ollama), under a risk-management layer.
